SURESH PERUMAL

Bangalore, Karnataka | +91 9346142860 | psuresh9346@gmail.com | LinkedIn Profile

SUMMARY

Computer Science graduate with strong foundations in software development, Python programming, and front-end web technologies. Experienced in building data-driven applications and developing responsive user interfaces using HTML, CSS, JavaScript, and React. Skilled in implementing machine learning models, integrating APIs, and managing structured datasets. Demonstrates strong problem-solving ability, debugging skills, and experience writing clean, maintainable code. Familiar with SQL databases, version control using Git, and modern software development practices. Passionate about developing scalable applications that combine efficient backend logic with intuitive user interfaces.

EDUCATION

Sreenivasa Institute of Technology and Management Studies College

2021 – 2025 | BTech in CSE (Artificial Intelligence & Machine Learning) | CGPA: 8.20

Sri Vivekananda Junior College

2019 – 2021 | Higher Secondary Education | Percentage: 77.5%

Sri Viswam Public High School

2019 | Secondary School Education | CGPA: 9.80

PROJECTS

Real-Time Detection of Diabetic Eye Disorders Using Deep Learning **December 2024 – May 2025**

- Developed a machine learning-based application using **Python** to detect eye diseases from medical images.
- Performed **data preprocessing and feature engineering** to improve model performance.
- Built a **responsive front-end interface** using **HTML, CSS, and JavaScript** to display predictions and results.
- Integrated the **frontend UI with backend prediction logic using API calls**.
- Implemented modular code structure to maintain clean and scalable application architecture.
- Conducted debugging and testing to ensure accurate predictions and stable application performance.
- Documented the system workflow, implementation process, and evaluation methodology.
- **Project Link**

Brain Tumor Detection Using CNN **January 2024 – June 2024**

- Built a **neural network-based classification model using Python** for detecting brain tumors.
- Managed the **data processing pipeline** including cleaning, transformation, and preprocessing.
- Designed a **user-friendly web interface** for uploading and analyzing medical images.
- Integrated **REST API communication between frontend and backend services**.
- Optimized algorithms and application logic to improve prediction accuracy and performance.
- Implemented structured programming practices for maintainable and reusable code.
- Maintained technical documentation covering design logic, testing, and system workflow.
- **Project Link**

SKILLS

- **Programming Languages:** Python, Java.
- **Web Development:** HTML, CSS, JavaScript, React.
- **Data Base:** SQL, MongoDB.
- **Tools & Platforms:** Git, Git Hub, Jupyter Notebook, VS Code, Eclipse, MS Office.
- **Additional Skills**: Leadership**,** Problem-Solving, Analytical Thinking, Team Collaboration.
- **Languages:** English (Proficient), Telugu (Proficient), Hindi (Intermediate)

CERTIFICATIONS

- **Internship Certificate in Data Science | Certificate Link**
- **Internship Certificate in Web Development | Certificate Link**
- **NPTEL Online Certification on Cloud Computing | Certificate Link**
